

Create a web page that uses the following programming languages:

HTML, Javascript, jQuery and CSS. Your web page can be of any topic. Ie. Sports, Gaming, Music, School,...

Link the pages of your web page to a central Home page which links to the other pages that demonstrates your understanding of the software we have used this year.

For example, maybe start with an HTML home web page that uses Frames and then link this page to a JQuery page and a JAVASCRIPT page.

HTML requirements (Checklist)

<input type="checkbox"/> Different fonts <input type="checkbox"/> Background pic (no tiling) <input type="checkbox"/> Background color <input type="checkbox"/> Position Text and Pics using div tags <input type="checkbox"/> Frames <input type="checkbox"/> Animated gif's	<input type="checkbox"/> Links to a URL and to another web page you designed <input type="checkbox"/> Insert images of all sizes <input type="checkbox"/> Create image buttons to link to a web page <input type="checkbox"/> Create image button to thumbnail to a larger picture <input type="checkbox"/> Create a text field for user input (Forms)
--	--
